

REMARKS

Claims 2-6, 24-34, 36 and 38 are pending in the present application. Claims 36 and 38 have been amended.

In the Advisory Action dated February 12, 2004, the Examiner has alleged that claims 36 and 38 do not further limit the claims from which they depend. The Examiner has suggested amendment of claims 36 and 38 to respectively feature a silicon layer thickness of 50-70 nm.

Claim 24 as pending features a thickness of the silicon region is in a range of 50-100 nm. Previously pending claim 36 as dependent upon claim 24, further features that the thickness of the silicon region is less than 70 nm. Applicant respectfully submits that previously pending claim 36 thus further limits claim 24, because the recited range is effectively narrowed to one less than 70 nm.

Although Applicant does not necessarily concede that amendment of previously pending claim 36 is necessary, claim 36 has been amended as suggested by the Examiner to feature that the silicon region is "in a range of 50-70 nm". Claim 38, as dependent upon claim 30, has been amended in a somewhat similar manner.

Conclusion

Favorable consideration and entry of this amendment are earnestly solicited, to place the present application in better form for appeal.
